# Mohamed Khaled Dridi

Software Engineering Student

mohamedkhaled.dridi2@gmail.com +216 90161543
mohamed-khaled-dridi upwork.com/Mohamed Khaled D.

## Professional Summary

Software engineering student passionate about building interactive and scalable software systems. Experienced in gamification, full-stack web development, and automation testing. Skilled in designing engaging user experiences, creating reliable software architectures, and collaborating in agile environments. Always eager to learn new technologies and apply programming knowledge across multiple domains including games, web, and automation.

## Education

**South Mediterranean University - MEDTECH** *Sep 2020 - Present*
Engineering Degree (Specialization in Software Engineering)
**Mohamed Dachraoui High School** *July 2021*
Tunisian baccalaureate

## Experiences

**Renske** *Sep 2024 - Present*
*Multiplayer Unity Developer*
- Designed and implemented core gameplay systems and backend communication for multiplayer features
- Collaborated with designers and developers to deliver optimized, cross-platform gaming experiences
- Managed the full lifecycle of development — from architecture and prototyping to testing and release

**HSTECH** *May 2023 - Aug 2023*
*Game Developer / Software Engineer Intern*
- Developed a 2.5D interactive application using Unity and C#
- Integrated custom grid systems and implemented gameplay logic with reusable components
- Participated in design discussions and code reviews following best software engineering practices

**MassAnalytics** *Jul 2024 - Sep 2024*
*QA / Automation Intern*
- Developed Selenium-based automation scripts for web applications
- Conducted manual and automated testing, logging issues using Jira
- Collaborated with developers to enhance software quality and testing coverage

**IEEE Robotics and Automation Society (RAS), SMU** *Jul 2022 - Mar 2023*
*Technical Trainer*
- Conducted workshops on Arduino programming and embedded systems
- Guided students in understanding electronics, sensors, and robotics control logic

**SMU Medtech University** *Jul 2025 - Aug 2025*
*Bootcamp Instructor — Unity and Game Development*
- Taught students the fundamentals of software design and programming through Unity
- Created practical exercises and mentored student projects from concept to prototype

## Hackathons & Competitions

- **Game Development Hackathons (2x)** — Created complete prototypes under time constraints focusing on gameplay and code structure
- **Blockchain Hackathon** — Designed and implemented decentralized application concepts
- **App Development Hackathon** — Built an app to improve university service accessibility

## Projects

**2D Story Game**
- Developed a narrative-driven 2D game combining platformer and top-down perspectives
- Designed animations, visual effects, and scripted transitions for an immersive experience

**Robotic Arm with 2D Inverse Kinematics Simulation**
- Implemented a simulation that demonstrates 2D inverse kinematics and control algorithms
- Built user interaction features for real-time movement control and feedback visualization

**PGard Simulator (Enova Robotics)**
- Created a 3D Unreal Engine simulation for autonomous robot patrol on user-uploaded maps
- Implemented realistic sensor behavior and navigation control systems
- Developed OpenCV-based fire, human, and face detection for the robot's onboard camera

**Full-Stack Web Application — Partagi**
- Designed and developed a full-stack sports booking app using Flutter and Django
- Implemented database management, authentication, and real-time notifications

## Technical Skills

**Programming:** C#, Python, Java, C, JavaScript, SQL, MongoDB
**Game Development:** Unity (2D/3D), Gameplay Systems, Animation, Photon Networking
**Web Development:** Flutter, Django, React, REST APIs, Docker
**Software Tools:** Git, Figma, Jira, Selenium, Blender, Fusion 360
**Languages:** English (Bilingual), French (Bilingual), Arabic (Native)

## Achievements

- Two-time Best Project Winner — Fondation SMU
- Upwork Rising Talent Badge with 0% client dissatisfaction rate
